

## Egg Carton Bird Feeder

### Materials:

- Egg carton
- String, twine, yarn, etc.
- Scissors
- Birdseed/food

### Directions:

1. You can either cut your egg carton into smaller sections or leave it one piece; this part is up to you. I had a carton that could hold 18 eggs, so I cut it into three smaller pieces.
2. On each corner of your carton(s) poke a small hole with your scissors. This is where the string will thread through.

3. Cut 4 pieces of string of equal length. The length is up to you.
4. Thread a piece of string through each hole created in the corners of the carton. Tie the piece of thread to the carton. Double or triple knot it so it is secure.

5. Go outside and find a limb to tie the feeder to. (It's best to tie it after choosing your limb so you don't have to wiggle it over/around branches that may be in the way.)
6. Fill the feeder with bird seed.

7. Watch as birds come to their new feeder to eat!

**Visit the Wilbur D. May Arboretum and Botanical Garden and look for the different bird feeders throughout the gardens!**
